It is on Canadian account, and will not be shipped until next week. Nesslage & Fuller will ship \$100,000 to-day If all the gold expected to be shipped to-day goes forward the amount will be \$1,350,000, exclusive of the Bank of Montreal's withdrawal for next week. W. H. Crossman & Bro. have ordered \$1,000,000 in gold for export. Steinwender, Stoffregen & Co. have withdrawn the \$250,000 gold from the subtreasury which they announced for ship-ment to-day. Statement of the condition of the treasury shows. Available cash balance, \$186,593,415; gold reserve, \$107,118,235.

A lower range of values was established in a large majority of the stock traded in on the exchange yesterday. The general cause was heavy dealing by bull pools, the members of which had decided to take profits, feeling that the market was losing the greater part of its outside support. Engageof which was to come from the subtreasury, also tended to weaken the market. At the opening Sugar was sold freely, declining 1% per cent., while the rest of the list fell off a fraction. The reactionary tendency was quickly checked and a fairly good purchasing movement set in. Shortly after 11 o'clock a general decline took place. The bear attack had spent itself at about delivery hour, and under the covering of short contracts a rally was effected of 160 116 per cent., the latter in Chicago Gas, and 1 per cent. each in Sugar and Pacific Mail. In the last quarter of an hour Sugar and Chicago Gas were again sold heavily and broke 1% and 1 per cent., respectively, the rest of the list easing off fractionally and the market closing weak. Among the net losses on the day are: Sugar, 374; Sugar treasury, also tended to weaken the marthe market closing weak. LOCAL GRAIN AND PRODUCE. Trade Rather Quiet, and Prices

Breaking in Some Lines. On the wholesale streets and on Commison row trade was rather slow yesterday in most lines. Grocers, hardware men, leather dealers and druggists are about the only merchants who say that their trade

steady tone, but, coming to Commission row, prices are breaking badly, and in descriptions of fruits and vegetables there is a glutted market. Receipts of apples and melons are large beyond precedent, and both apples and melons sold at very low figures yesterday. In Irish potatoes good stock could be purchased at 45c per bu. Cabbage is about the only vege-table which holds its own. Tomatoes are becoming plentiful. Pears and plums are in good supply, and unless the trade of yesterday and to-day cuts down the surplus a good deal of fruit will be lost in the next forty-eight hours, as at this sea-son of the year it decays rapidly. Choice peaches are in good demand and bring good prices, but inferior fruit is hard to dispose of. The hide market shows a little more activity, at unchanged prices. The iron and nail market continues firm at the advance of last Wednesday. Receipts of poultry and eggs are light, and both mar-

kets are steady and firm. The local grain market is dull, yet, with light receipts, the prices quoted are read-ily realized. Track bids yesterday ruled as Wheat-No. 2 red, 67c; No. 3 red, 61c; wagon wheat, 67c.

TRADE FALLING

SUDDEN HALT TO IMPROVED CONDI-TION IN BUSINESS.

Industries That Boosted Prices Recently Will Have to Put Them Back Where They Belong.

NEW YORK, Aug. 2.-R. G. Dun & Co.'s weekly review of trade, which issues to-morrow, will say: There is a perceptible halt which may deceive if attributed to wrong causes. Trade two months late in spring pushed forward into July a large share of business belonging to April or May. Seeing a rush of orders out of time many imagined it would continue, and hurried to give other orders. The jam of two months' business into one lifted prices. Then other orders came to anticipate a further rise. But the midsummer halt was inevitable, and it is yet somewhat uncertain how much improvement will appear after it. The crop of corn promises to be the largest ever grown, and is almost out of harm's way. The crop of wheat appears from later accounts perhaps 20,000,000 bushels smaller than was expected a month ago, and had the best hopes been realized it would have been more than 100,000,000 bushels short of a full crop. Cotto believe in 7,500,000 bales than believed in 8,000,000 a month ago. Larger stocks than were immediately wanted have been taken by traders as prices were advancing, and these tend to limit future orders. The general advance in many products also causes reluctance to purchase, and the distribution of the past half year has been in part to make up for stocks and indi-vidual supplies depleted during two years of economy. On the other hand there has been enormous increases in the working force and a considerable increase in wages paid, which enables people to buy more freely. Strikes of some importance appear, but do not yet threaten to last long, though a strike of coal miners may for a

time affect business somewhat extensively.
The hopeful spirit prevailing in nearly all markets may find its warrant in spite of some shortage in crops. For the first time since the rise in prices of iron products began there have been some concessions to retain business and efforts of new works to get orders tend to check the advance. In spite of this the general average of prices is a shade higher, general average of prices is a shade higher, bar having risen relatively more than mill iron has declined. The market for pig is quiet, and on the whole remarkably strong, with the prospect of increased output. Finished products are generally strong, with more demand than can at present be met for plates and for bar. The droscoggin, 9-4, 16½c; Androscoggin, 10-4, 18c.

Sugars unchanged. has been made with moderate demand for some bleached and brown goods, and prices are firm for sheets and drills, while colored cottons are quiet with occasional advances. Sales of wool have been only 6.072,450 pounds for the week, against 9.-336,400 in 1892. Wheat suddenly rose 3 cents on bad reports of condition, but has dropped all the gain as the scantiness of exports is felt, shipments in July having been only 3,495,064 bushels, flour included, from Atlantic ports, against 9,865,633 last year. Western receipts continue very

small and farmers appear to be holding for higher prices. Corn is a shade stronger, although the reports are decidedly favorable. Cotton has risen an eighth in price, wholly on bad condition reports, but at the lowest estimate the year's yield, with stocks carried over, will exceed the world's demand. Heavy sales of coal are reported at prices at least 70 cents below the circular, and the market is much demoralized. cular, and the market is much demoralized. with fear of auction sales. Failures for the week have been 261 in the United States, against 230 last year, and 28 in Canada, against 44 last year.

Bradstreet's Review. NEW YORK, Aug. 2.—Bradstreet's report to-morrow will say: The week presents a larger volume of trade in many lines and at many points than the weeks before and one year ago. The rush of orders for steel and fron leads in interest, displaying remarkable strength. Western manufacturers have been obliged to purchase Eastern billets to meet their orders. Another conspicuous feature of the week is the evidence of reviving confidence on the part Western and Northwestern interior merchants, now that the and spring wheat crops promise This is shown plainest at Chicago, St. Louis, Milwaukee and St. Paul, where order demand and sales to buyers in person have increased to a striking extent. At the South general trade remains of as moderate volume as previously noted, Nashville and Galveston alone reporting material gains. There is a better outlook and feeling at Charleston, but elsewhere midsummer quiet rules. Delay in paying the sugar bounty affects trade very unfavorably in Louisiana.

Trade on the Pacific coast is of moderate volume, fair for the season, Tacoma and Seattle reporting an expansion of demand and Portland and San Francisco no material change, Exports of wheat (flour included as wheat), from both coasts of the United States and from Montreal show a moderate increase over a week ago, the total being 1,460,000 bushels, a gain of about 200,000 bushels. This is due to increased exports of flour, principally from New York, Baltimore and Newport News. This week's total of wheat and flour exports of 1,460,000 bushels is contrasted with 2,-977,000 bushels a year ago, 5,622,000 two years ago, 3,978,000 bushels in the corre-sponding week of 1892, and 4,638,000 in a like week of 1891.

EXPORT SCARE GOLD

IT SET THE BULLS ERANTIC AND THEY BEGAN TO UNLOAD GRAIN. Wheat Went Off 1-4c and the Decline

Extended to All Cerenls, as

Well as Provisions. CHICAGO, Aug. 2.-The rumors of gold exports scared the bulls to-day and all Board of Trade markets closed lower. Wheat closed at a decline of 4c per bushel: corn lost Ic; oats, %c; pork, 35c per brl;

conditions of the wheat market once more caused a reversal of general sentiment. Some few who had interpreted the surroundings differently from the general crowd bid from 1/3c to 1/4c per bushel over the closing price of the day before, but they were immediately overwhelmed with offerings and, in consequence, those who wished to buy wheat and waited fifteen minutes, got all they wanted at 68%c. The opening quotations for September were 70c, against 69%c at the close. The early dispatches from New York had for their most prominent feature the report that \$1,500,000 gold would be shipped from there to-morrow. There was nothing else in the earlier telegraphic news to account for the great change in public opinion, but that was enough to deepen the distrust with which the traders came prepared. The depression deepened still further as the forenoon waned, until about 12 o'clock, September wheat was down to 681/sc. The Chicago in-spector showed 52 carloads of new wheat received and only three of them up to the contract grade standard. A year ago re-ceipts here were 583 cars, of which 393 were of the contract quality. The total receipts at primary Western markets were 307,000 bushels, against 871,000 bushels a year ago. The one disturbed feature of the statistical exhibit was the exports. From the four principal Atlantic, ports, the exports for twenty-four hours comprised only 19,000 bushels of wheat and 3,000 barrels of flour. The stocks of wheat at Minneapolis have decreased 1,200,000 bushels this week and at Duluth 150,000 bushels, according to advices from there and, notwithstanding the almost complete stoppage of the export trade, another substantial decrease in the visible seems assured. The foreign markets were firm at the opening. Liverpool quoted 1/2d advance; Berlin 1/4 mark gain, and Paris was quoted at only a small fraction lower than it closed vesterday, and had turned to the complete stoppage of the export trade, another substantial decrease in the visible steady; No. 2 mixed, 21/2c. Oats steady; No. 2 mixed than it closed yesterday, and had turned that into an advance at the close. The rea-son for the upturn at Paris during the day was on account of rainy weather in France was on account of rainy weather in France where the harvest is in progress. In the afternoon there was a tendency to recovery from 68½c. Near the close the price was holding firm around 68½c. The firmness of the foreign markets and the taking of a few more loads of red wheat at Baltimore and spring wheat at Duluth tended to give the market here the appearance of firm-ness it was exhibiting after its consider-able break. The closing quotation for Sep-

tember was 681/20685c.

Corn weakened in the afternoon, after a very firm start at an advance of 1/4c over yesterday's closing quotation for September. The opening trades were at 44c in a ber. The opening trades were at 44c in a few cases, but there were very few sellers at that. It droppd gradually at first, but later the decline became more rapid until the price was down to 424c. It then recovered to 42%c, at which price a lot was sold. The opening of May was at 35%c and it declined to 34%c, and closed at 35%35%c. The day's receipts were 314 cars and for tomorrow 415 are the estimated arrivals. The cash demand was perceptibly reduced and as that has been the principal offset and as that has been the principal offset to the fairly good receipts, the weakness was doubtless due, in a large part, to that

Oats opened steady at yesterday's closing quotations and held so for some time under the influence of general buying orders from shippers and New York people. Later on the market counteracting a very heavy feeling from corn and lower prices prevailed. September opened at 22½c, sold to 21%@21%c, and closed at 21%c.

The provision market opened firm because The provision market opened firm because published stocks at the end of the month proved smaller than had been expected. They were not sufficiently reduced, however, to prevent the general break in grain affecting speculative sentiment. The price of everything yielded to pressure from the short sellers in the afternoon. Pork for the day closed with a decline of 35c; lard, .05c, and ribs, .07½c. Receipts of hogs were 9,000. Estimates for Saturday—Wheat, 75 cars; corn, 415 cars; oats, 215 cars; hogs, 6,000 head.

nents. 600.

Mr. Nicholson Rends It and Criticises Some of the Jurist's Observations.

To the Editor of the Indianapolis Journal: Having just read Judge Taylor's somewhat remarkable decision on the new liquor law, it may not be out of place for a layman to make a few observations. It will be noticed that no attempt is made to declare the law unconstitutional, but it is declared to be inoperative. The Judge, however, does not seem to be impressed with that fact so much as that the last General Assembly did not know how to make laws. In fact, he is impressed with the thought that the members were a set of ignoramuses, with not the "capacity and integrity to draft laws, and not the moral courage to enact them when properly draftthe people not to criticise him. The suspicion is strong and the presumption great that the political complexion of the Legislature had everything to do with the Judge's moral curtain lecture to the people for even daring to elect an assembly of and light Castings. Car Bearings a specialty. Repair such political proclivities. Had not the Judge gone out of the way to attack the personal standing and integrity of the members of the General Assembly by means of a stump-speech under the guise of a legal opinion, the decision rendered would de-serve little more than a passing notice. Had the declaration of the court been of that dignified character that usually clothes judicial decisions, it might then have commanded the respect and even confidence of many people, but with the central idea almost obscured by a lot of individual opinions designed to let the author of them down easy before the people, it will evidently not be received with overwhelming enthusiasm, even by those who hoped for a decision adverse to the law.

Judge Taylor holds that the penalty provided in Section 4 does not hold good, unless all of Sections 2, 3 or 4 are charged with

being violated; and yet does he not see that a section has been violated when any of its parts have been disregarded? A chain is broken when a single link is broken, and it is not necessary that every link be broken or that the entire chain be broken to say that the chain is broken. When a part of the whole is impaired, the whole must suf-fer in consequence. This is but a part of the common unwritten law, and no technical construction based upon precedent can cal construction based upon precedent can overthrow it. Because the penalty applies to "the foregoing sections," and not to the "different provisions of the foregoing sections," the Judge holds the penalty inoperative and decides that "the foregoing sections" means "the foregoing sections in their entirety." And yet the section does not say that, and the Judge has no more wight to construe it in that way when the right to construe it in that way, when the language does not say it, than he would have had to construe it, as the counsel for the State held, as applying when there was only a partial violation. Granting even the presence of a reasonable doubt, the State had just as tenable grounds as had the Judge who made the section mean what it did not say, but when, in addition to technical reasoning, it is known that there is the common and universal law that an injured part impairs the whole, the State has the only reasonable and tenable grounds, and the Judge's decision is necessarily far-The Judge talks about preserving men's

rights and liberties by the integrity of the courts. If the different provisions of the section are necessary for the maintenance of law and the protection of society against public evils—and the Judge does not even deny that they are necessary or just-there is then injustice in deciding in their favor when the universal law leads so strongly in that direction in this case. In fact, is not there injustice to the people when a point is strained unduly and beyond reason against them? It is extremely fortunate that there is a higher tribunal to which the point may go sooner or later, and when it speaks there will be no stump-speeches to mar the dig-nity of whatever decision it may render.
